Rating & Sentiment

 user ★★★★☆

Good liquid cooling unit.
Somewhat easy to install, controls CPU temperature very well, works as described.
Would recommend

 user ★☆☆☆☆

One Star
Vary cheap and badly made no rma and they leak all the time pos

 user ★★★★☆

Good quality
This PSU is from a very reputable company. The build quality is awesome, the efficiency is fantastic and it powers many different PC parts with ease. It runs cool and quiet.

First one they sent didn't work. Cost me \$60 to have the have the problem diagnosed. **Corsair sent a second unit that works but I get to pay return postage.**

Delivery

user2

loud, no where as efficient as expected. to get decent cooling the fans have to spin at a high rate of speed, which in turn = way too loud!
